Ableton Live is all about the studio as a musical instrument.

One.

Create, produce and perform music with your computer.

Arrangement View

A familiar DAW workspace. Time moves from left to right, while tracks are stacked vertically.

Session View

A unique sketchpad for improvising with musical ideas without a timeline. Launch audio and MIDI loops and play with effects, instruments, routing and more – all in real time, all in sync.

Two.

All the instruments and sounds you need to make music.

Drum kits

A wide selection of classic drum machines, one-shot samples and multisampled acoustic drum kits.

Packs

On-board sounds including vintage synthesisers, acoustic instruments and unique combinations of sampling, effects and synthesizers.

Synths and samplers

Powerful physical-modelling, FM and sampling-based devices for endless inspiration.

Loops

Versatile audio and MIDI patterns that cover everything from vintage soul to hip-hop to electronica and beyond – ready to use in your productions.

Three.

Effects for processing and tweaking your sound.

Audio effects

A wide selection of audio processors, from the classic to the unorthodox.

MIDI effects

Devices to rearrange, constrain or randomize MIDI notes in endless variation.

Max for Live

Max audio and MIDI devices let you push the limits of what you can do with your DAW.

Four. A Flexible DAW.

External hardware

Easily control your hardware synthesizers and effects directly from Live.

Make your own Racks

Combine multiple instruments and effects into a single device and control parameters with customizable controls.

Plug-in support

Full support for VST and AU plug-ins alongside Live's own devices.

More online

Get more instruments, sounds and patches at [Ableton.com](https://www.ableton.com).

Six. A whole world of control possibilities.

MIDI controllers

Control Live with any MIDI controller.

Multi-touch

Control Live with your iOS or Android device via third-party apps.

Max for Live

Download or create your own Max devices to customize or extend your controller.

Flexible MIDI and keyboard mapping

Map MIDI knobs, sliders and buttons, or even your computer keyboard, to almost every control in Live.

Five. Audio to MIDI.

Beatbox your drum loop

Capture musical ideas as audio clips and develop them further as MIDI.

New sampling possibilities

Extract harmony, melody or drums from samples or from your own recordings.

Seven. Discover Max for Live.

Now included in Live 9 Suite

An ever-expanding universe of unique devices.

Convolution Reverb

Get the sound of any space in your mix.

Control Devices LFO

Modulate any parameter in Live.

Drum Synth

13 tailor-made percussion synths.

Buffer Shuffler 2.0

Rearrange and mangle any audio in real time.

Granulator II

Transform any audio into a lush soundscape.

Plus access to thousands of user-created Max for Live devices.

Eight. Try Ableton Live 9 for free.

Get all the features of Live 9 Suite with no limitations for 30 days.
Trial version available in stores and at [Ableton.com](https://www.ableton.com).

All three editions of Live 9 integrate seamlessly with Push.

Push is a new instrument that solves an old problem:
how to make a song from scratch.

With hands-on control of melody and harmony,
beats, sounds, and song structure,
Push puts the fundamental elements of music-making
at your fingertips.
